CON

2017

Rhyme3

The world's first automotive CTF

Eduardo Novella & Dana Geist

Agenda

1. About Riscure
2. Rhme series
3. What is new about RHme3?
4. How can you participate?

Riscure

1. Side Channels (smartcards, chipsets (SoCs), IoT,...)
2. Fault Injection (smartcards, chipsets (SoCs), IoT,...)
3. Embedded Devices (gas meters, routers, STBs, IoT,...)
4. Software (TEE, HCE (mobileSec), DRM, WB crypto)
5. Tooling (Inspector and its HW gadgets)

What is Rhme a.k.a **R**iscure **H**ack **ME**?

**Embedded
hardware CTF**

DO

ALL THE CHALLENGES!

Rhme Series

2015

2016

2017

Rhme

- CTF challenge running in an Arduino Nano clone
- First hardware CTF ever published

Team

Alexandru Geana

Ramiro Pareja

WANTED
RICHMOND COUNTY SHERIFF'S OFFICE
MOST WANTED

ALEXANDRU GEANA
5'10" 170 lbs.

WANTED: Hacking and industrial espionage

\$1000 Reward

Contact the Richmond County Sheriff's Office

What is new
about

- Embedded CTF created by Riscure in partnership with Argus Cyber Security.
- Automotive flavor
- Challenges that simulate real-life scenarios

Rhme3

A custom board has been developed for RHme3!

RHme3

A custom board has been developed for the RHme3!

Atmel
XMEGA

CAN
controllers

- The pre-qualification stage finished on the 28th of August
- It included three challenges
 - Exploitation
 - White-box cryptography
 - SCA
- We had a limit of 500 boards, and participants had to solve at least one challenge to qualify for a board
- ~1000 participants registered

Do you still want to play?

We have 5 boards to give out to the first participants that solve:

- RE binary: **antir2**
- EXP binary: **main.elf**

<https://github.com/enovella/r2con-prequals-rhme3>

Rules...

- First come, first served
- Solutions to: eduardo@riscure.com
 - Subject : **r2con2017 RHme3**
 - **[name || nickname]**
 - **Write-up including the flag & full r2 log**
- The winners will be announced at the end of the conference and will receive their boards at home in November

USE RADARE TO FIND THE SOLUTION!
